

Monitor your tanks from anywhere

Observant Tank Monitoring Kit

Check your tank level from your smartphone, tablet or PC.

Set SMS alerts to know when your tank level is running low.

Use the history graph to identify water usage trends.

Expand later with camera, electric pump control, flow meter or rain gauge.

Observant Tank Monitoring Kit

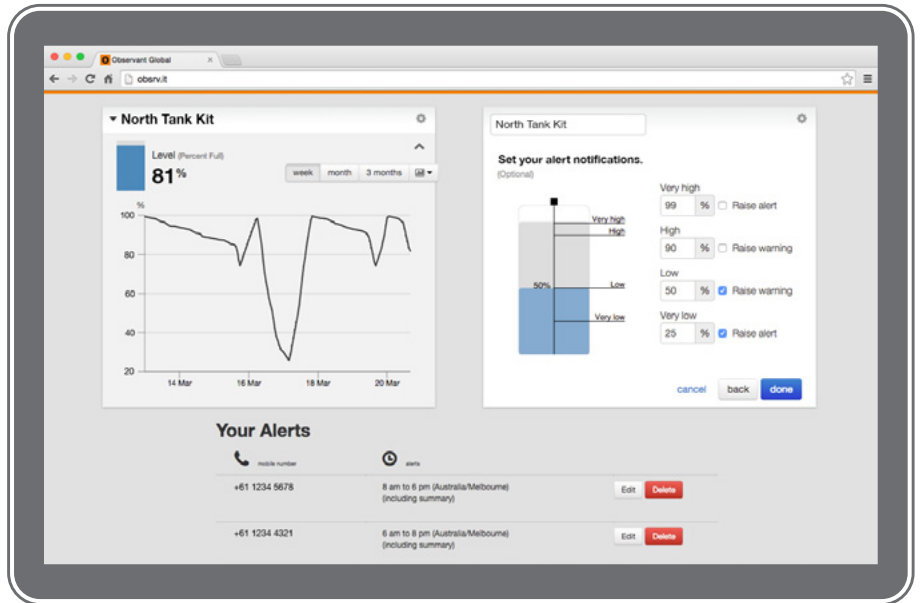

“ We have very hot summers and if stock are without water for a few hours they can become extremely dehydrated. Our tank level monitoring solution now gives us peace of mind knowing that our stock are never stressed because of a lack of drinking water. ”
Richard Cannon, Manager, “Rosevale”, Hay, NSW

Access your water levels from anywhere

The Observant Tank Monitoring Kit provides you a complete water level monitoring solution. This innovative product provides you all the hardware required to monitor water levels, as well as access to Observant Global™, our ground breaking software application which allows you to remotely access water levels from any Internet enabled device.

- 1 Current Tank Level**
Continually checks the tank level and updates every half an hour.
- 2 Historical Data**
Graph water usage trends with weekly, monthly and 3 monthly historical data.
- 3 SMS/Email Alerts**
Receive SMS or email alerts when your tank level is outside its normal range.

Simple self installed hardware

- 1 30 Minute DIY Install**
Simple roof-mount installation. Two kits are available for tank heights up to 4 m or 15 m.
- 2 Inbuilt Level Sensor**
Positioned above the water line means it's suitable for water of any quality.
- 3 Connect with Telstra**
Australia's best mobile coverage provider.
- 4 Robust Design**
Purpose built for the harshest of conditions.

Important information

The DIY tank kit is recommended to only be installed on tanks with steel or poly roofs that are in good condition and safely accessible by a ladder. As the kit is solar powered ensure it's exposed to direct sunlight most of the day.
