- 4) At the bottom of the catalog search results page are several order and search options. Depending on the configuration setup for their account the user may select Xpress Checkout. This offers a more expedient checkout method which eliminates the need to enter shipping information. Additionally users may proceed through the standard checkout procedure, save their order so that it can be modified at a later time or continue shopping. (fig 4)

- 5) Clicking on the "product detail" button opens a new window which presents a larger part image and weight information. The user may add the part to the order and checkout from this page as well. (fig.5 and fig.6)
